

PISTON PUMP

Our specially developed piston pump with stainless steel housing and gear motor ensures a gentle treatment of the fluid to ensure optimal separation of free oils.

The piston pump is self-priming and slow running, which means that the fluid is not whipped around. It can handle many types of fluids ranging from low to high-viscosity. The piston pump is capable of dry running and can maintain a vacuum under various conditions.

MODEL	SP2
Flow capacity	2 L/min
Power supply	1x230V / 3x400V + PE 50 Hz
Protection grade	IP54

- ✓ **Unique piston pump**
Our specially developed piston pump with stainless steel housing ensures efficient flow.
- ✓ **Self-priming**
- ✓ **Capable of dry running**
- ✓ **100% stainless steel construction**
Produced in AISI 304 / EN 1.4301.
- ✓ **CE Machinery Directive**
The piston pump is produced in Denmark in conformity with the EU Machinery Directive.
